DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 23 September 2003 has been entered.

Allowable Subject Matter

2. Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification and Applicant's Remarks/Arguments, the prior art of record fails to specifically disclose an optical amplifier comprising a gain fiber having a doped fiber core and a cladding layer surrounding the core, the mode field diameter of the gain fiber being greater than 10 μm and the refractive index difference between the core and the cladding layer being selected such that the cut-off wavelength at which the gain fiber becomes single mode lies in the range 1000-1550 nm. The invention is distinguished from the prior art by the use of gain fibers and not transmission fibers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
